COMPANY

Bee Propolis Brasil is a company specializing in the production and marketing of bee products, with a focus on green propolis, recognized worldwide as the "Green Gold of Minas Gerais". Our headquarters are located in Bambuí, in the heart of the Serra da Canastra, a region privileged by its fertile soil, favorable climate, and abundant vegetation, which offers ideal conditions for beekeeping.

Our apiaries are located in this unique natural environment, near the source of the São Francisco River, which guarantees the purity, quality, and authenticity of the products we bring to the domestic and international markets. Bee Propolis Brasil combines tradition, innovation, and respect for nature to enhance beekeeping in Minas Gerais and offer the world the best of Minas Gerais.

In this unique "terroir," highly favorable to *Apis mellifera* bees, the result is large-scale, high-quality beekeeping production. Bee Propolis Brasil maintains its own apiaries and also guarantees the purchase of production from more than 250 families of qualified beekeepers, ensuring the origin of its products through a complete traceability system.

With an area of over 7,000 m², including 2,000 m² of modern facilities, the company efficiently and safely houses all stages of the production process. Bee Propolis Brasil continuously invests in infrastructure, equipment, new technologies, and staff training, reinforcing its commitment to offering excellent products and serving its customers in Brazil and abroad with quality and reliability.

Caring for beekeepers and respecting the environment are fundamental pillars of Bee Propolis Brasil, positively impacting the local community through income generation, job opportunities, health, and ecosystem preservation.

Located in Bambuí, in the heart of the Serra da Canastra, in the central-west region of Minas Gerais, the company is situated at the birthplace of green propolis production. It is in this privileged environment that wild rosemary develops, an essential plant that gives green propolis its unique properties, recognized worldwide for its high medicinal value.
