

FRUIT AND VEGETABLES

COMPANY

Rancho Sagrada Família's mission is to produce mangoes with high quality standards and high productivity, consistently serving international markets, including the United States, Europe, Korea, and Mercosur countries. Our commitment is to supply fruits that meet global technical and sanitary requirements, ensuring excellence from cultivation to final delivery.

In addition to focusing on results, we deeply value socio-environmental responsibility. We operate with sustainable practices, preserving natural resources, promoting the conscious use of soil and water, and respecting all people involved in our production chain. Thus, we combine agricultural efficiency, respect for the environment, and human value to deliver world-class products.

PRODUCTS

NCM 0804.50.20

The mangoes produced at Rancho Sagrada Família follow a rigorous traceability system at all stages of the production process, from field management to transport and shipping. All production is conducted using inputs that are duly certified and registered with the Ministry of Agriculture and Livestock (MAPA), and meets the highest international compliance standards, including GLOBALG.A.P and GRASP certifications. This rigor ensures transparency, food safety, and total quality control.

The management is carried out with advanced techniques and meticulous cultural practices, ensuring fruits with high sweetness (high Brix degree), superior visual appearance, firm texture, and excellent resistance to transport and storage. As a result, the mangoes have greater post-harvest durability, maintaining freshness, flavor, and quality even after long journeys to the main consumer markets in the world. The entire process fully complies with environmental and labor standards, reflecting the company's commitment to sustainability, social responsibility, and ethical production.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

Rancho Sagrada Família produces mangoes of the Palmer, Tommy Atkins, Keitt, and Kent varieties, with an annual capacity of approximately 1,000 tons.

The production period includes the months of March, May, June, July, August, September, October, and November, guaranteeing regularity in supply to the market.
