

# HONEY AND BEE DERIVATIVES

## COMPANY

Wal Mel began its activities in 2012 in the city of Bonito in the state of Mato Grosso do Sul, after identifying bees as a source of business. A family business that, united by the desire to take advantage of what nature provides, collects and packages wild honey, adding economic value to the family and the town.

And what was once a distraction has become a passion that will cross generations.

Wild honey is made up of different flowers and is the most widely consumed honey in Brazil. It is recommended for a healthy nervous and respiratory system.
