

COFFEE

COMPANY

The Moreira, Capistrano, and Alckmin families have been producing high-quality coffee in the Mantiqueira de Minas region of Minas Gerais since the mid-20th century.

Currently in the 5th generation of coffee growers, they produce on 9 farms in the region, always seeking innovation and acting in various stages of the production chain. They offer their partners and clients varied options of natural, washed, and also fermented coffees, always focused on quality, productivity, and sustainability.

PRODUCTS

NCM 0901.11.10

For five generations we have produced and delivered quality coffee, with consistency, traceability, and care for the ecosystem. We value partnerships and long-term relationships in the coffee chain.

Our farms are located in a mountainous region, known as the Mantiqueira de Minas (indication of origin), with altitudes of up to 1350m, producing high quality Arabica beans. Because of the altitude, the harvesting process is manual and careful, adding quality to the final result of the chain.

A company with family tradition, producing high quality Arabica coffees in the mountainous Mantiqueira region of Minas Gerais, with consistency and high productivity. The harvest is done manually, which adds more value to the grains and employs more hands in the community.
