

COMPANY

We started by studying microalgae, such as chlorella, but at the same time we wanted a tasty, plant-based product that was very Brazilian.

Our mission is to develop and deliver solutions, providing a better quality of life in a sustainable and innovative way. And so Surreal Bisks was born, a startup that makes healthy plant-based snacks and combines innovation and consumer trends in its products. In addition, our projects prioritize Brazilian ingredients and more sustainable production chains.

PRODUCTS

NCM 1905.90.90

A line of healthy, plant-based, gluten-free and lactose-free savory snacks. As well as being nutritious and tasty, they are made with natural ingredients in surreal combinations.

The base of our snacks is beans and cassava, a combination that provides protein and promotes satiety and crunchiness for longer. The lipids present come from canola oil.

Passion fruit, in addition to all its tropicality, provides more fiber and antioxidants.

Gluten and lactose free, vegan, preservative free, clean label, natural and Brazilian ingredients, a source of protein, a source of fiber, extremely crunchy and tasty make the product a combination of unique and surreal flavors.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

Production capacity today is 20,000 snacks per month, which could easily be tripled. We don't suffer from seasonality.

Tão saudável e delicioso que nem parece verdade
