

DaleÔ

BRAZILIAN COFFEE

COMPANY

Founded in 2020, in Cianorte, Paraná, Daleô Cafés was created with the purpose of valuing Brazilian specialty coffee and bringing producers and consumers closer through quality, knowledge, and experiences. We operate as a specialty coffee shop and roastery, with technical expertise from bean selection and roast profile development to the final cup experience.

We work with coffees from different producing regions in Brazil, serving consumers and companies. Constantly expanding, Daleô seeks to strengthen its national presence and bring the excellence and identity of Brazilian coffee to the international market as well.

PRODUCTS

NCM 0901.21.00

Daleô Cafés specializes in the production and commercialization of 100% Arabica specialty coffees, carefully selected from some of the most recognized producing regions in Brazil, such as Mandaguari, Norte Pioneiro do Paraná, Mantiqueira de Minas, Cerrado Mineiro, Caparaó, and Alta Mogiana. These origins provide the portfolio with a wide

diversity of sensory profiles, reflecting the richness and quality of Brazilian coffee farming.

All coffees are purchased with origin traceability and subjected to rigorous selection and quality control criteria. Each batch receives an individually developed roast profile, using technology and precise monitoring to preserve and enhance its natural attributes, highlighting characteristics such as aroma, sweetness, balance, and sensory complexity.

Daleô Cafés' portfolio includes exclusive blends, microlots, and award-winning coffees, offering different flavor profiles and commercialization formats to serve consumers, coffee shops, specialty stores, and markets. The company combines origin curation, technical knowledge, and specialized roasting to deliver high-standard and consistent products.

Maintaining a close relationship with producers and cooperatives, Daleô Cafés values the authenticity of each origin and selects coffees that represent the best of national production. This commitment to quality allows us to bring specialty coffees to the Brazilian and international markets that translate the diversity, identity, and excellence of beans produced in Brazil.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

Production capacity of up to 10 tons per month, with its own roasting structure, rigorous quality control, process standardization, and traceability at all stages, ensuring consistency, safety, and excellence in the final product.
