

COMPANY

Cultivating Organic Excellence, Strengthening Family Farming.

For over 30 years, Ecocitrus has combined passion and purpose to produce high-quality organic citrus juices and essential oils. Our cooperative model supports over 100 farming families, ensuring fair income and a collective commitment to environmental preservation.

Located in the fertile Vale do Caí, in southern Brazil, Ecocitrus is a pioneer in sustainable agriculture through agroforestry systems and biodynamic principles. Our high-tech processes preserve the natural essence of each fruit, delivering consistent quality and remarkable flavors to our partners worldwide.

PRODUCTS

Ecocitrus produces high-quality NFC and concentrated citrus juices, pulp cells, and organic essential oils. The cooperative brings together over 120 family farmers from Vale do Caí (RS) and has its own processing, extraction, and composting facilities, with an average capacity of 100 tons of fruit per day. Its differentiators include Organic (QIMA IBD/NOP/EU),

Demeter, Fairtrade, Kosher, and SGF certifications, as well as traceability, cooperative production, and over 30 years of experience in domestic and international markets. Certified by FLOCERT (Fairtrade) since 2005 and by QIMA IBD, Ecocitrus operates with a focus on sustainability, socio-environmental responsibility, and valuing family farming, ensuring high-quality products with controlled origin.

Our differentiators lie in the use of selected organic fruits, grown specifically for the production of juices, concentrates, and essential oils, ensuring high-quality raw materials and standardization. Through a cooperative model, we bring together family farmers committed to sustainable practices and environmental preservation. Furthermore, we control the entire production chain, from cultivation to processing in our own facilities, ensuring traceability, authenticity, and excellence in our products

Products: mandarin and lemon juices (HS Code 2009.39.00), orange pulp (HS Code 2008.99.00), orange juices (HS Code 2009.12.00), frozen orange juices (HS Code 2009.11.00), frozen lime and lemon juices (HS Code 2009.39.00), lemon essential oils (HS Code 3301.13.00), mandarin essential oils (HS Code 3301.19.90), orange essential oils (HS Code 3301.12.10), and lime essential oils (HS Code 3301.13.00).

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

Average processing capacity: up to 100 tons of fruit per day, varying according to crop seasonality, with an annual processing capacity of approximately 18,000 tons, ensuring scale, operational efficiency, and meeting market demands.
