

COFFEE

COMPANY

A traditional coffee farm, it has been producing specialty coffees since 2008. Always concerned with delivering the best to our customers, it pays special attention to environmental preservation and to its employees by providing training courses through SENAR.

We are working with Regenerative Agriculture.

We are working with Regenerative Agriculture.

Located in an exceptional region for the production of this grain, at an average altitude of 1.100m, and always with the continuous attention of its owners throughout the production and post-harvest process, the farm has won numerous quality awards and is a benchmark throughout the region.

PRODUCTS

Fazenda dos Tachos, one of the oldest in the southern Minas region, has been in the same family since 1780 and has been producing coffee on its high, fertile land for over 100 years. In 2008, we obtained our first certification and began to focus on specialty coffees.

The unparalleled quality of each process is achieved under the constant guidance of its owners and agronomists. The farm is currently certified by Certifica Minas and Fair Trade. We are a benchmark for good practices in the production of sustainable coffees, considering environmental preservation and social development at all times. In addition to producing coffee, Fazenda dos Tachos offers a complete experience at its roasting plant, coffee shop and restaurant, so that consumers can feel and experience the routine of the farm that produces the drink most loved by Brazilians.
