

REGIÃO  
DAS MATAS  
DE MINAS

COFFEE

## COMPANY

We are four brothers who began cultivating coffee with our parents as partners (sharecroppers) over 40 years ago. On the same farm, we have succeeded and acquired new areas where we cultivate our crops in a family system focused on producing specialty coffees that also feature a high level of sustainability.

We represent 40 families of small-scale coffee producers who are committed to pleasing our customers with the quality of our artisanal products.

## PRODUCTS

NCM 09.0111. 10

Coffees with a wide variety of aromas and flavors thanks to the different micro-climates that we have at our properties. A pleasant finish and balanced acidity packed with abundant sweetness, citric and floral flavors.

Artisanal coffees produced collectively and sustainably by small-scale farmers and their families in a region that still possesses 19.36% of the remaining Atlantic forest. We are situated in the eastern region of the state of Minas Gerais, composed of 63 municipalities that represent 36,000 farmers with areas of up to 20 hectares.
