COMPANY

We are dedicated to the production of high-quality extra virgin olive oils, made from our own olive groves cultivated on our rural property. The entire production process, from the cultivation of olive trees to the extraction of the oil, is carried out in our own facility, located at Fazenda Passo do Jacaré, ensuring traceability, quality control, and preservation of the product's natural characteristics.

Our journey began in 2019, with a commitment to producing olive oils that express the authenticity of the terroir, combining technology, sustainability, and good agricultural practices to offer an excellent product to the market.

PRODUCTS

We produce nine varieties of extra virgin olive oil, available in 250 ml and 500 ml packaging, all made with a high standard of quality and excellence. Our olive oils have already won several international awards, recognizing the care taken in all stages of production and the sensory quality of our products.

We have a modern extraction facility equipped with cutting-edge technology from the renowned Italian manufacturer Pieralisi, a global benchmark in the olive oil sector. This investment ensures maximum efficiency in processing the olives and the preservation of the natural characteristics that give our olive oils their identity and quality.

The excellent market acceptance of our products is reflected in the high customer satisfaction and loyalty rates, who recognize attributes such as freshness, authenticity, sensory balance, and consistent quality in our olive oils.

Competitive pricing aligned with market demands, with high acceptance among consumers and resellers. Our brand is recognized for the quality of its products, and its differentiating factor is the extraction carried out on the property itself, allowing for immediate processing of the olives after harvesting. This ensures greater freshness, preservation of aromas, and excellence in extra virgin olive oil.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

Our current production capacity is approximately 30,000 liters per year, considering all varieties produced. Our orchards are reaching their full production phase, providing greater volume and regularity in supply.
