

CACHAÇA AND SPIRITS

COMPANY

GUERINO GIUBERTI, an Italian immigrant, lived in the town of Santa Tereza/ES, where he owned a property, and was married to Tereza Vacari Giuberti, with whom he raised his family. Guerino was a farmer ahead of his time, he thought big and saw the opportunity to expand his business far beyond agriculture, livestock and brown sugar production. He started producing cachaça for his own consumption and realized that this would be a great investment. That's when he moved with his whole family to the town of Rio Bananal/ES in 1939 and founded the CACHAÇA GG factory.

Located on the Giuberti farm in 1940, the name chosen was a tribute to the founder himself.

PRODUCTS

NCM 2208.40.00

CACHAÇA GG is a family business, which has been passed down from generation to generation, in 2019 ERISTEU GIUBERTI JUNIOR took over the business and since then has been investing heavily in restructuring the factory from acquiring quality equipment as well as developing new products such as GIN and Vodka, and thus continuing to build the history of the GIUBERTI FAMILY in the city of Rio Bananal/ES. This entire history is a source of pride for the family and the city.

In addition to cachaça, the factory currently produces vodka and gin. Cachaça is produced by hand in copper stills and natural fermentation of the sugar cane juice itself.

In addition to being a well-established product on the market for over 80 years. At GG we are committed to the quality of our products and our concern for the environment. All the waste generated in the industry in the milling area and the vinasse is reused as fertilizer for the estate's crops or becomes a source of energy to run the factory's boilers. The residue from distillation is transformed into alcohol fuel for the estate's cars.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

The alembic has a production and storage capacity of 1 million liters per year. Today he has around 400,000 liters of aged cachaça in stock. Last year's production was 40,000 liters. Our harvest starts in August and lasts until December.
