

OLIVE OIL

COMPANY

DOMENICO AZEITES started its activities in Mar/2023, the natural result of two years of interface with the largest olive oil producers in Rio Grande do Sul, qualification courses in sensory emphasis carried out from 2021 onwards at national and international entities and the identification of one of the biggest bottlenecks in the marketing of this premium product: expanding the tasting channels with the Brazilian consumer.

The aim of giving consumers access to our extra virgin olive oil and, through tastings, building consumer loyalty, will guarantee a differentiated and knowledgeable public for the national olive production chain, giving preference to our product over imported oils of dubious quality, to say the least.

PRODUCTS

NCM 1509.20.00

Sachet of Brazilian extra virgin olive oil, bottled from producers in Rio Grande do Sul, from the harvest of the year of bottling, previously tested for quality parameters and biophenols content in Brazilian and Italian laboratories. Presented in kits of 10/20/50/100 units, with QR CODE and access to all traceability and quality data. Currently, 02 varieties, a Blend and an Arbequina, the latter of which took 1st place in a competition held by the CNA in Sep/23 as the best Monovarietal.

Practicality: anytime, anywhere
Quality: opened, consumed (no risk of loss of quality due to partial consumption)
Traceability: all production data, harvest, bottling, producer, reports
Healthfulness: lab-certified biophenols (polyphenol and tocopherol) content (antioxidants and anti-inflammatories)
Right size: 10 ml

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

THE CAPACITY FOR FILLING SACHETS IS VERY FLEXIBLE AND CAN WITHSTAND ANY ONE-OFF DEMAND.

The 2023 filling was 50,000 sachets, with production from the 2023 crop harvested and processed between February and May 2023.
