

COMPANY

We are a Brazilian company with 15 years of experience. We develop nutritional supplements in shot format (ready to drink).

Our desire is to improve people's quality of life with new products and solutions, in an agile, simple and transparent way. Our method of "idealizing and realizing" results in high added value for the product, guaranteeing its place in the domestic market and opening the way for the brand's international presence. In addition to Brazil, our products are present in Paraguay, the United States, Mexico, Bolivia, the Philippines and Canada.

PRODUCTS

NCM 2106.90.30

Qualinova Liquid Collagen is hydrolyzed, ready for consumption, separated into 55ml bottles. It contains 10g of bioactive collagen per dose (equivalent to approximately 20 capsules), as well as vitamin A, C, zinc and selenium.

It is recommended as a supplement for anyone over the age of 30, as our body reduces its production from that age onwards. People who spend a lot of time in the sun, who smoke or who have an unhealthy diet, can start consuming before the indicated age, as these factors worsen skin health, stimulate premature ageing and can interfere with collagen production in the body.

Ready to drink, 6 different flavors, high concentration of bioactive collagen.

Colágeno
Líquido

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

In 2023, we invested heavily in machinery and managed to triple the production capacity of our operation. From research and development to filling: we control 100% of the production stages to guarantee quality and results.
