NCM 0901.11.10

With 90 hectares dedicated to the cultivation of Arabica coffee, Fazenda Sendai has been producing coffee continuously since 1999. Starting in 2017, a new management system was implemented, adopting an agricultural production line focused on efficiency, sustainability, and quality, based on the "aggregate soil" philosophy.

Since 2020, Fazenda Sendai has been producing specialty coffees, meeting international quality standards. We operate through direct exports, primarily to the European and Arab markets.

In 2025, we consolidated our international presence through a strategic partnership with a commercial agent in Milan, Italy, strengthening our global reach and adding value to Brazilian coffee abroad.

Our commitment is to produce excellent coffees, focusing on soil quality and respecting the needs of the crop. To achieve this, we utilize irrigated and mechanized farming, combined with best agricultural practices, ensuring standardization, high productivity, and respect for the environment at every stage of the process.

We offer a 100% Brazilian product, with the origin and traditional profile of national production. Our cafes feature:

- 40% sieve 17+**
- Hard drink for better (82+)**
- Consistent and reliable quality**

Sustainability, responsible production, and efficient logistics, facilitated by proximity to the capital Brasília, are pillars that ensure agility in international operations and shipments.
