

COMPANY

Doces Caseiros Crochemore is a family business located in the region of Pelotas, in Rio Grande do Sul, with a history of over 90 years dedicated to the production of sweets, preserves, and fruit-based preparations. Over generations, the company has consolidated its operations by preserving the knowledge and traditions of artisanal production, combined with the evolution of industrial processes and a commitment to quality.

With a strong regional identity, Crochemore values the selection of raw materials and the preservation of the fruits' characteristics in its products, uniting tradition, experience, and production capacity. Its history represents the continuity of a family legacy built over decades, focusing on quality, authenticity, and the valorization of food production in Rio Grande do Sul.

PRODUCTS

NCM 2000.00.00

Our portfolio includes a wide variety of fruit-based products, including peach, fig, pineapple, orange, strawberry, pumpkin, and quince in syrup, as well as guava paste, peach paste, quince paste, and fig paste. We also produce aseptic pulps of peach, strawberry, pineapple, and guava, intended for the juice, beverage, and food industries.

We combine over 90 years of sweet-making tradition from the Pelotas region with industrial processing technology, using controlled processes that ensure quality, safety, standardization, and the preservation of the fruits' natural characteristics. We maintain close relationships with local producers, valuing family farming, reducing waste, and adding value to regional production.

With this commitment, we seek to preserve the traditional flavors of southern Brazil, strengthen the economy of the communities where we operate, and expand the presence of our products in new markets, including the international scene.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

With over 90 years of tradition, Crochemore combines the confectionery excellence of Pelotas with a modern industrial structure, producing up to 2.5 million units of compotes per year. The company also has an aseptic pulp line of up to 100,000 liters per month, offering quality, standardization, and customized solutions for its clients.
