

FISH

COMPANY

Solidified in the creation of fish (Tilapia and Panga fish) and crustaceans (Vannamei and Malaysia Giant) in tanks, in a sustainable and technological way. Initially, the company commercializes only fresh fish nationally, but its planning includes the processing of these products as well as their distribution in international markets. Its mission is to promote the technological and sustainable development of the national aquaculture, with emphasis on scientific research and valorization of the human being, aiming at the recognition of a model company of sustainable development and of technologies applied to aquaculture processes within the regional scenario.
