

COMPANY

Pitol companies operate in the pecan market throughout Brazil. The group includes 4 companies and aims to disseminate the culture of pecans. The first company was founded in 1970, PITOL VIVEIROS, with the aim of producing grafted pecan-nut seedlings. The Viveiro Pitol is a pioneer in the state of Rio Grande do Sul and its founder, Mr. Luizinho Pitol, is recognized by many for his experience when it comes to this matter.

The companies of the Pitol Group complete themselves! From the field to the industry, we do from the planting of the seedling, to the processing of the fruit, in the form of food or cosmetic!!

PRODUCTS

NCM 0802.31.00

Pecans with peel in its in natura state. Manually selected for export standard, almonds have an average productivity of 50% to 52% and a size considered ideal for the foreign market.

The Pitol nuts with peel are selected and unique.

After harvesting, they go through a manual selection process, in which any almonds that are not in the company standard are discarded. When all of it is analyzed by trained professionals, they soon proceed to storage in sanitized and standardized bags, to receive the product. As standard, they are stored in 30 kg in the cold room at the following temperature:

- 3 months/around 10 degrees
- 6 months or more/from 0 to 5 degrees.

Still, the company adapts to any order, makes the classification of the product by size and variety, according to the standards established by the customer.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

Pitol has a productive capacity to industrialize from 120 to 150 tons per year. From April to June the company supplies raw material, both from its own production, and from other customers who sell the fruit to the company.

After harvesting, the fruit is dried and selected for storage in 30kg packages.

It is made annual stock, that is, stored in cold rooms for durability from 1 to 2 years, so that the fruit retains its properties and taste.
