PLANT-BASED DRINK

COMPANY

Nasc Agroindustrial is a Brazilian company located in Beberibe, Ceará, a region known for its cashew nut production. We work in the development and marketing of plant-based nutritional solutions for the B2B and retail markets.

Our mission is to add value to the cashew production chain through innovation, sustainability, and food processing technology.

Amenvita is a powdered plant-based drink made from cashew nuts, developed using proprietary micronization and dry processing technology.

The formulation preserves the natural nutrients and lipids of the cashew nut, offering a practical, nutritious, and sustainable alternative for consumers and companies seeking plant-based products.

Made from Brazilian cashew nuts, this product is 100% plant-based, lactose-free, and has a creamy texture. Produced through a completely dry industrial process, it features a Clean Label concept, long shelf life, easy storage, and significant reduction in logistics costs, as well as lower water consumption in the production process. Its versatility allows for applications in plant-based beverages, sports nutrition, plant-based formulations, food service, coffee shops, restaurants, natural product stores, and health food distributors.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

Current production capacity of 2,000 kg per month, equivalent to approximately 4,000 packages of 500 g. A structure prepared to serve distributors, retailers, and B2B partners with continuous supply. The production structure allows for standardization, traceability, and gradual expansion of capacity according to demand.
