

COMPANY

Divinut was founded on July 17th, 2000, in Cachoeira do Sul, by Edson Ortiz and his wife, Marúcia.

We set up the shelling plant, which is now the largest in the southern hemisphere, and at the same time we set up a pecan tree nursery, which has become the largest in the world, with the aim of selling seedlings grafted with North American hybrids to producers, providing technical assistance and buying their production.

Divinut is a South American benchmark for pecan nuts and pecan trees, always following all the rules for cultivation and processing, high quality standards and eco-efficiency.

PRODUCTS

NCM 0802.32.00

We set up the Divinut Production System, which now has more than 4,000 producers in 700 municipalities in southern Brazil. Most of them small family farmers.

Experience all the exquisite flavor of pecan nuts with the highest quality and meeting the highest standards of production and product handling.

A predominantly monovarietal Barton product (the main hybrid grown in Brazil), with a light color and a sweet, mild taste. Uniform oblong shape. Strict compliance with Good Manufacturing Practices. Supply of product in the off-season in Mexico and the United States, as we harvest in Brazil from April to June.

We work with USDA peeled pecan nut standards.

FMH (Fancy Mammoth Halves), FJMH (Fancy Junior Mammoth Halves), FJH (Fancy Jumbo Halves), Mammoth Pieces, Large Pieces and Medium Pieces.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

WE HAVE A DAILY PRODUCTION CAPACITY OF 15 TONS OF PEELED PRODUCT PER DAY.

We work all year round, but with greater availability from April to December.
