

**OLIVE
OIL**

COMPANY

The first olive grove was planted in 2016, with 1,200 trees on 4 hectares. In 2019/2020, a further 2,300 trees were planted on 10 hectares.

In 2020 we had our first harvest. We harvest entirely by hand.

Our olive oils are marketed through social networks, restaurants and specialty emporiums.

PRODUCTS

NCM 1509.20.00

We produce extra virgin olive oils in intense or mild blends, depending on the varieties they contain. We also have a monovarietal of the Greek Koroneiki variety.

In a chemical analysis, our oil obtained an acidity of 0.15 and a peroxide index of 7.10.

Sensory analysis shows an intense green fruity aroma with herbaceous notes of green leaves such as cabbage, green herbs, rosemary and the freshness of freshly cut grass. On the palate it has a strong entry of arugula, basil and spices such as pepper. It also has notes of dried fruit such as walnuts and chestnuts

**Sustainably produced
Manual harvesting
Filled with nitrogen**

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

**THE FILLING CAPACITY IS VERY FLEXIBLE
AND CAN HANDLE ANY SPECIFIC DEMAND.**

The olive grove is still young, but its production is notable for its precocity.
