

COMPANY

Founded in 1980 (creation of the Apiário Nectar). We have spent three decades in search of the best products bees can offer. In 1990 (Nectar Farmacêutica foundation), we internationalized expanding our scope: biotechnology, phytotherapy and compound pharmacy.

In 2001 we started exports and in the same year we obtained ISO 9001 certification. We export to the demanding Japanese market and other Asian countries, the United States, Europe and Africa. We meet the preferences of our customers through: "Nectar Farmaceutica Ltda" and "W Moura Comércio e Indústria Ltda" and brands: "Pharmanectar", "Bee Amazonic" and "Fito Viva" owned and managed by the same Board of Directors.

PRODUCTS

With a focus on apitherapy, phytotherapy, pharmaceutical handling and export, we achieved in 2001 the crowning of our quality policy, receiving the ISO 9001 certification by four international accrediting institutions.

Today Pharmanectar is a respected brand that stands out for its quality and commitment to good service.

We export products to demanding markets such as Japan, USA, and Europe, but without losing focus on individualized pharmaceutical attention.
