

COFFEE

COMPANY

With decades of experience in the world of specialty coffees, Falcafé has a specialized and experienced team, which through quality establishes long-term connections between local producers and buyers worldwide.

Through our Neighbors and Friends project, we share our knowledge and promote training to our partner producers, increasing the production of specialty coffees in our region, and offering them the opportunity to export their coffees to the most demanding international buyers.

PRODUCTS

NCM 0901.11.10

We take our coffees to the world with essence, transparency, and sustainability in practice, working in a fair way for the whole production chain, with excellence in the commercialization of fine and certified coffees, bringing unique coffees to the cups of more than 30 countries.

Falcafé seeks the constant evolution of the quality of coffees in its region. By holding quality contests, which in 2022 reached its 7th edition, we were able to reward the dedication of the producers who year after year have been improving the quality of their coffees. This rise in quality can be seen and felt with the growth in the scores of the coffees that participate in each edition of the competition, especially among the finalists.

We are located between the main states of the coffee sector in Brazil: São Paulo and Minas Gerais, with a complete structure for process operations equipped with the most modern and sophisticated systems and machines, that can re-process up to 100,000 bags of coffee per month. Our warehouse has capacity for 250,000 bags of coffee, which are stored in 60kg bags or Big Bags.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

Our warehouse has capacity for 250,000 bags of coffee, which are stored in 60kg bags or Big Bags.
