HONEY AND BEE DERIVATIVES

NCM 0409.00.00

NCM 0410.00.00

COMPANY

Beeva Brazil is a foodtech that uses technology, information and innovation as allies for beekeeping products valorization and diversification, fostering a new culture of responsible consumption, creating opportunities for different market segments.

Beeva carries out the processing and marketing of products with the denomination of origin preservation and consequent protection of Brazilian biomes.

Our purpose is to promote sustainable development in the semi-arid climate, reduce social vulnerability, generate income with environment preservation and restoration using beekeeping as a tool.
