## COMPANY

We are a Brazilian brand of organic açai, the purple fruit richest in antioxidants and fiber in the world. Goola açai is born in the Amazon, is extracted from the palm trees of the forest, processed in the industry of the Goola Group in the North of Brazil and transported with great zeal to the whole world.

Our products bring the taste and purity of the Amazon and its people, and also take back to the forest more life and development, our greatest inspiration. Every Goola product comes from a project that values fruit growers and, of course, nature, offering the highest quality to our consumers.

## PRODUCTS

Frozen açai purée is extracted from the edible part of the fruit of the açai tree (*Euterpe oleracea*, Mart.) with the addition of water and subsequent filtration, presenting from 11 to 14% of total solids and a dense appearance.

The açai ice cream is made from the pulp of açai, with the addition of sugar and other food ingredients, giving the product a consistency of ice cream ready for consumption.

Both products were obtained by pasteurization process in order to eliminate possible pathogenic organisms guaranteeing the integrity, quality and microbiological safety of the product.
