

COMPANY

We are a family business that has been in the market for more than 20 years with an emphasis on watermelon production. We are the third generation to continue agricultural production, bringing a mark of history and quality to our production.

We are organic production certified, having been certified by opac xique-xique, where certification is carried out using the participatory system.

PRODUCTS

Our fruit has a unique taste and sweetness (high brix) which is provided by our location, that is, the soil where we are located, which is mostly sandy (arenaceous) and characterized by its high water drainage capacity, it is light, rich in nitrogen and organic matter. These conditions favor the development of the roots, the absorption of nutrients and the production of sweet and tasty fruit - Our watermelon will bring a unique experience to the palate.
