

**JUICES AND PRESERVES  
FROM FRUITS**

## COMPANY

I was sitting talking to my wife and on that clear night with a full moon I'll never forget, there was absolute silence on the farm and Helena, at the age of 3, sat on my lap and, in a moment of our own, asked me why I didn't plant crops on the farm for her and for other people? There, I felt that God had used my daughter as His instrument and that He had used her to open a direct dialog with me. Today, I know that at important moments He chooses the best night, the best weather, for the universe and talks to me in a soft, calm voice.

And so in 2013 Di Helena organic was born. In a whisper from God, using my daughter as an instrument, on a perfect night without any noise. A mission is born that will positively impact people and give value to the things that God has given us and what He provides as a prosperity plan for the whole region.

## PRODUCTS

The property has been in the family for over 50 years and Helena is the fourth generation of the family to be raised in this region of the Atlantic Forest. Today, Di Helena has more than 50 organic products of its own, grown and manufactured in a self-sustaining ecological agroindustry, and Helena has been selling her products since she was 3 years old. Today, Di Helena moves the region forward by encouraging other local farmers to produce organic products, joining Helena in transforming the Atlantic Forest region into a pesticide-free region. Di Helena is the dream of a girl who wanted to eat healthy and who is transforming the entire Atlantic Forest region.
