COMPANY

It is on the land that the acai berry is born and grows that the history of Petruz is rooted. For more than three decades it has cultivated knowledge, dedication and love to the Acai Superfruit and other Amazonian riches. All this experience guarantees to responsibly select the best ingredients of nature and share with more than 45 countries food that is safe and full of flavor.

The quality standard of the fruits, processes and marketing of Petruz are attested by large companies and independent organizations. Petruz products, from the cultivation of the fruit to its delivery on the consumer's table, carry in addition to their natural composition, a very important ingredient: social responsibility.

PRODUCTS

The Acai Berry (*Euterpe Oleracea*) is a small dark violet fruit that comes from the acai tree, a palm tree of the Amazon rainforest. It is rich in nutrients, healthy and energy properties, because of this, it has earned its place among Superfruit. Among its benefits stands out: Anthocyanin that fights free radicals, vitamins A, C and minerals making it act as a powerful anti-inflammatory effect and prevent cholesterol and the risk of heart disease with omegas. From this superfruit, Petruz produces pulps, ice cream, sorbets and cubed acai, in addition to processing other regional and tropical fruits.

Pure organic acai pulp

Organic acai pulp with guarana
