

COMPANY

Finoagro was founded in 1986, in the municipality of Ipanguaçu (RN), under the name Fiação Nordeste do Brasil S.A (Finobrasa). After a period producing cotton to supply the textile activity branch of the Vicunha group, the company began producing mangoes for export, achieving significant growth in the following years, and is now present in the states of Pernambuco, Rio Grande do Norte and Ceará, producing and processing fruit for all regions of the world.

Finoagro values natural resources, respecting reserve areas and applying processes that minimize environmental impacts.

Finoagro, a company that produces/exports fresh mangoes and grapes and frozen tropical fruit products.

PRODUCTS

For a consumer to enjoy fruit on their table, a long road needs to be traveled. That's why, right from the start of cultivation, our main concern has been to plant sustainability and respect for mankind and the environment.

Thus, we reap solidity and quality. These are the values that guide Finoagro's work.

Thanks to our structure and appropriate production processes, we are able to offer a constant supply of products to the market. Quality product, guaranteed by food safety certifications, good agricultural and socio-environmental practices.
