

**HONEY AND BEE DERIVATIVES**

## COMPANY

ItaBrasil's history in beekeeping began more than forty years ago, driven by the passion of its founder, beekeeper José Maria de Oliveira, for bees. With more than thirty thousand of its own hives, the company stands out as a pioneer in the production of the renowned Própolis Verde, valuing Brazilian biodiversity and guaranteeing organic products of high quality and authenticity.

At ItaBrasil, our commitment goes beyond product excellence. We are committed to making a positive impact on society, the environment and people's well-being. Our approach to Corporate Social Responsibility is rooted in our core values, reflecting our dedication to sustainability, ethical business practices and community engagement.

## PRODUCTS

**NCM 0410.90.00**

Green propolis, originating from wild rosemary, is known for its antioxidant power and high concentration of phenolic compounds, such as Artepillin-C, recognized for its effectiveness against cancer cells and viruses such as H1N1 and COVID-19.

Its antibacterial and anti-inflammatory properties strengthen the immune system, making it a natural antibiotic widely studied and used as an alternative to strengthen immunity.

The Green Propolis produced by ItaBrasil comes exclusively from designated areas of Minas Gerais, recognized by the abundance of wild rosemary (*Baccharis dracunculifolia*), which provides unique characteristics. With 30,000 hives in mountainous regions and free from contaminants, they guarantee sustainable production methods.

Recognized for its high concentration of Artepillin-C, it stands out for its benefits. These attributes highlight the excellence and authenticity of ItaBrasil's Green Própolis, making it a reliable choice for those looking for high-quality natural products and origin control.

### DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

With its own propolis production of more than 30,000 hives, the company has a production and processing capacity that exceeds 50 tons of propolis per year, offering a variety of presentations, including raw material and ingredients for the food, cosmetic and pharmaceutical industries, in addition to extracts in various formulations.
