

HONEY AND BEE DERIVATIVES

COMPANY

It all started when I left the countryside and came to study in the city. At weekends when I visited my parents, friends would ask. Didn't you bring anything from the farm? One day, believing my grandfather's teachings in my dream, I took a jar of HONEY.

What began as a kindness to friends became a journey of entrepreneurship and purpose. Motivated by the desire to grow, we formalized our business.

In 2021 I got married and built a family, my husband and daughter are 100% committed to Vitorino. Today we are a family with an entrepreneurial profile, and our focus is to bring this honey to every home and family in the world.

PRODUCTS

Wildflower Honey 240g, 260g and 500g

This honey is 100% produced by Apis Mellifera bees catalogued as (European Africanized), multifloral, predominantly nectar from native Brazilian wildflowers, from the Atlantic Forest biome.

Bracatinga Honeydew 200g and 500g

Authentic taste of Bracatinga honey extracted from the secretions of the cochineal that inhabits the Bracatinga tree, this dark-colored honey with its distinctive flavor is a real treat for connoisseurs of high quality.

Propolis in Capsules

Immune booster: Propolis is known for its immunomodulatory properties, strengthening your natural defenses against everyday challenges. Powerful Antioxidants: Fight free radicals and protect your body against oxidative stress, maintaining vibrant health.

Liquid Green Propolis

Made from resins collected by bees, its liquid formula is rich in beneficial properties for the body. With a flavor, aroma and color that vary according to the botanical origin of the resins, Própolis Verde Vitorino is the right choice for those who want to enjoy the benefits of green propolis, which comes from the rosemary plant.
