## COMPANY

The FZP Coffee Innovation Group specializes in the production and marketing of Arabica coffees in green, roasted and ground beans. In addition to the coffee produced on its own farm, the company sells grains from small producers, promoting and strengthening family farming in the country.

The coffees are produced at altitudes above 1200m, in the Campo das Vertentes region in the state of Minas Gerais-Brazil. The products have guaranteed origin and quality, with support for good agricultural practices and sustainable processes. Our region results in coffees with fruity and floral flavors, and perfect balance between acidity and sweetness.

## PRODUCTS

In the Arabica coffee line in green beans, we work with common and exotic varieties. Among our line of Arabica coffees, there are the following varieties: Sudan Rume, Geisha, Red Bourbon, Yellow Bourbon, Pink Obatã, Yellow Obatã, Pink Maragogipe, Yellow Maragogipe, Laurina, Pacamara, Ibairi, Yellow Caturra, Red Catucaí, Red Catucaí SH3, Siriema, Paraíso and Arara.

In the line of roasted and ground Arabica coffee, the company has two own brands that are: "Donabê" which is our gourmet coffee, while "Paytã" markets the special nano lots. In addition, we produce coffee for "White labels" brands.

FZP Coffee Innovation's products go through a high-quality careful process. To ensure uniformity, all processing is done by machines through the process of beater, densimeter table, sieves and optical picker. Green coffees are stored in premium bags that protect the product from air, water and odors in the environment. For roasted coffee, we use a state-of-the-art roaster that runs the fully automatic process and our packaging is 100% biodegradable, in line with the company's ESG policy.
