

## COMPANY

ESSÊNCIAS BRAZIL was idealized and built with the mission of sharing with the world honey, pollen, propolis extract, essential oils and vegetables with 100% purity guarantee. Its raw material is cultivated in organic plantations and irrigated with water coming directly from the mountain springs of farms located in the Chapada dos Veadeiros, Cavalcante-GO.

From the personal experience of one of its founders, beekeeper Ronaldo Ramos, who twice won the award for best honey in Brazil, came the desire to share with the world the benefits of honey, pollen, propolis, and essential and vegetable oils.

## PRODUCTS

Pure Honey, Aroeira Flower, Silvestre, Orange Tree, Eucalyptus, Grapevine, and Sunflower. Essential and vegetable oils.

Honey is a food, usually found in a viscous, sugary liquid state, that is produced by bees from nectar collected from flowers and processed by the digestive enzymes of these insects, and stored in honeycombs in their hives to serve them as food. This delicious ingredient can strengthen our immune system, help with good digestion, and even fight constipation. But its benefits don't stop here: honey is antiseptic, diuretic, antioxidant, soothing, and expectorant.

Honey

**NCM 0409.00.00**

Propolis extract

**NCM 0410.00.00**

Pollen
