COMPANY

We are the 5th generation of our family producing coffee, and since 2007 we have dedicated ourselves exclusively to specialty coffees, being pioneers in the fine Canephora market and awarded in several regional and national quality competitions ever since.

In 2017 we founded our own micro-roastery, the first to exclusively use Robusta coffee, to learn more about the demands of roasters, which led us to a leap in quality as producers. At the forefront, we are the first canefora coffee producers to be members of BSCA, and also the first instructors at the CQI (Coffee Quality Institute) for processing high-quality robusta coffee.

PRODUCTS

Our focus is on producing high-quality Canephora coffee beans, with traceability, sustainability, and a direct trade model, ensuring transparency and consistency throughout the production chain. Our coffees are widely recognized for their aromatic notes of chocolate and cocoa, full body, high sweetness, and low acidity, resulting in a classic and balanced profile, highly sought after for the creation of espresso blends.

In addition to our naturally processed coffees, since 2012 we have also produced washed (pulped) coffees, and from 2016 onwards we have been working with controlled fermentations, expanding the sensory diversity of our portfolio without losing the identity of the species.

This combination of tradition and innovation allows us to supply some of the most renowned coffee shops in Brazil and the world, offering coffees with high sensory quality and highly competitive prices within the specialty coffee segment.

We work with specialty green coffee (NCM 0901.11.10) and roasted and ground coffee (NCM 0901.21.00), with production distributed throughout the months of January, February, March, April, August, September, October, November and December, ensuring a regular supply throughout the year.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

**Average production of 5,000 bags per year (expanding).
Internal re-processing,
reducing risks and delays.**
