

Néctar
Brasileiro

HONEY AND
BEE DERIVATIVES

COMPANY

Néctar Brasileiro was created by a couple of beekeepers passionate about nature and the fascinating world of bees. With dedication, we produce honey of quality and sustainability, respecting the environment. We strengthen the regional beekeeping chain with partnerships with small and medium producers.

We improve our methods with each harvest to ensure a standard of purity and taste. We work to exceed customer expectations by offering a noble and reliable food. Our honey is a tangible proof that it is possible to combine tradition, sustainability and love for bees in a product that brings health and pleasure to the table of our consumers.

Honey, nature's golden nectar, nourishes body and soul, with sweetness and finesse. In everyday life, it is the Hidden Treasure, a gift from the Bee, a shared delight. In its natural sweetness lies energy, an elixir of life, source of symphony. Vitamins, minerals, antioxidants to shine, in honey, the beauty of the Earth to reveal itself. It soothes the throat, hugs the heart, with magical properties, in every serving. Our health, it caresses and nourishes, in a gesture of love, that nature will future us. Thus, honey becomes more than food, it is an embrace of the Earth, a balm to the wind. In the daily diet, it is a unique gift, a sweetness that makes our day more special.

Wildflower honey: a gentle honey, originating from a variety of flowers from Brazilian forests, capturing the essence and biodiversity of our nature.

Eucalyptus flower honey: honey of dark color, with a refreshing and intense flavor, from eucalyptus flowers, offering a unique and striking experience.

Our honey is produced following a system of good production practices, in a sustainable way and with deep respect for nature.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

Our production capacity is 1000 tons per year.

Through our own production and partnerships with local producers, we produce eucalyptus blossom honey from February to April and wildflower honey from November to December.
