

ASCA

COFFEE

COMPANY

In December 2017, a group of specialty coffee producers from Araponga, in the Matas de Minas region, decided to come together to publicize and market their excellent coffees and our region. Thus, it was born ASCA (Association of Specialty Coffees of Araponga).

Today our producers seek excellence in management, handling and post-harvest to deliver to the market the best of our crops, coupled with experience exchanging and specialized technical staff. With an extremely artisan production, our mission is guided by the three axes of sustainability: social, environmental and economic.

PRODUCTS

NCM 09.01.11.10

Our coffees are the result of a perfect combination between the climate, the preserved nature of our mountainous region and the man, who in an artisan way, allied to the insertion of technologies, produces coffees with unique nuances complexities and flavors.

Our members have several awards in several contests, such as: ILLY espresso coffee quality contest; Cup of Excellence Contest, Coffee of the Year Contest, Abic Contest, Emater Contest; Florada Award Contest.

100% Arabica coffee of the varieties catuaí, bourbon, catiguá, catucaí.

Good cup, Fine cup, Specialty - 80-90 score SCA. Packing of 30 or 60kg in a spout or sieve 16 above.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

Average production capacity 7,700 bags of green coffee, in Good cup, fine cup and Specialty qualities, and there may be variations according to seasonality and weather.
