

HONEY AND BEE DERIVATIVES

COMPANY

The company was founded in 2000 and is involved in family farming. We are present in nearly every market in the state of Santa Catarina. We strive to maintain the quality of our honey by buying from the same beekeepers who have been loyal to us for many years. This way, we are familiar with the honey we are procuring.

The quality of our honey, most of which comes from native forests, is what separates us from others. Many of our beekeepers have been our partners for years, which makes it easier for us to maintain the quality of our honey.

PRODUCTS

NCM 04.09.00.00

A natural product produced by young bees to feed the queen. It contains significant amounts of proteins, lipids, carbohydrates, vitamins, hormones, enzymes, mineral substances, specific vital factors, biocatalytic substances in cell regeneration processes, thereby performing an important physiological action. There is no other substance known in biology and medicine that has a similar effect on the growth, longevity and reproduction of the species.

Mel Silvestre (Wild Honey)

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

We currently sell a total of **90,000 kg per year** within the state of Santa Catarina alone.

Our goal is to continue growing and to open new markets that will allow us to take our honey even further.
