

**FRUIT AND
VEGETABLES**

COMPANY

The story of Safe Fruit is the story of a passion that spans generations. Our origins lie in Lot 179, an agricultural area in the Maniçoba irrigated project, in the district of Juazeiro (BA), administered by Codevasf since the 1980s. It was there that my father, one of the pioneering settlers of the project, began a dream that united work, dedication and love for the land.

In 2016, when he passed away, I took on the mission of continuing this legacy. Today, with 30 productive hectares under mango cultivation, we continue to honor this trajectory, producing high-quality fruit that reaches the domestic and international markets. Safe Fruit was born out of this history, combining tradition, innovation and sustainability to bring the best taste of the São Francisco Valley to the world.

PRODUCTS

NCM 0804.50.20

Our products come from a family farm, part of an irrigated Codevasf project in the heart of the Vale de São Francisco - a region recognized worldwide as one of Brazil's largest fruit-growing hubs.

Mango is our flagship product, with our own production of the Kent, Keitt, Palmer and Tommy varieties, as well as selected fruit from small and medium-sized partner producers, always guaranteeing a local supply of excellent quality.

Guaranteed origin: Produced in the Vale de São Francisco (Juazeiro-BA and Petrolina-PE), an international benchmark in fruit growing. Own production + partnerships: Integration with small and medium-sized producers, strengthening local agriculture. Certified fruit: Commercially and socially recognized quality standard, ideal for domestic and foreign markets.

With the combination of tradition, certification and reliable origin, we deliver mangoes with authentic flavor, vibrant color and premium quality to delight consumers anywhere in the world.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

**Our company has a
production and processing
capacity of 400 tons of
mangoes per month.**
