

COMPANY

We are an industry specializing in the processing of bee products, located in Minas Gerais. We produce high-quality natural ingredients and end products for the pharmaceutical, food, cosmetics, veterinary and compounding pharmacy sectors, offering tailor-made solutions with efficiency and innovation.

We operate with state-of-the-art equipment, a highly qualified team and continuous investment in research and development, guaranteeing increasingly natural and effective formulations. Far beyond an industrial and commercial project, APISTECH was born with a strong sense of social responsibility and environmental awareness, valuing families of small rural producers and contributing to the preservation of nature.

PRODUCTS

Our portfolio includes powdered, liquid and pasty extracts of Brazilian green and red propolis, bee pollen and royal jelly, as well as drops, capsules, sprays and much more - all produced according to Good Manufacturing Practices and with a high concentration of natural bioactive compounds. With a horizontal production structure, we customize concentrations, solvents and forms of presentation to meet the specific needs of each client.

We use 100% natural raw materials, rich in polyphenols, flavonoids, terpenes and antioxidants, offering functional solutions with high added value for different sectors. Our commitment is to deliver premium products to the national and international markets, in compliance with regulatory requirements and high quality standards, always with a focus on sustainability and respect for nature.
