

FROZEN PRODUCTS

COMPANY

Fine Fatti Alimentos Ltda. began its operations 18 years ago, the result of a dream of its founder, Cesar Gheno. Inspired by the richness and simplicity of rural culture, he saw the potential in some of the foods most commonly found in family meals, such as polenta and cassava.

During its early years, the company also dedicated itself to the production of artisanal preserves and sweets, including blueberry and physalis jams, pickled cucumbers, and more than thirty varieties of candies, always prioritizing flavor and quality. With much effort, dedication, and passion for what he does, Cesar developed the high-quality products that Fine Fatti currently produces, establishing itself as a benchmark in foods that combine tradition, authenticity, and excellence.

PRODUCTS

Currently, Fine Fatti's main products include:

Fried Polenta: an innovative and pioneering product on the market, completely pre-fried, offering extreme convenience to the customer. Simply heat in an air fryer or oven, no need to add oil, while maintaining the ideal flavor and texture.

Polenta Sticks: developed with high investment in standardization and automated machinery, guaranteeing consistent quality and uniform flavor. The product line also includes Polenta Tolete and Stuffed Polenta, offering variety and convenience.

Cassava: available in tablets, which undergo processing, cooking, and molding into cubes, ready for frying or heating in an oven, microwave, or air fryer.

Cassava Sticks: cooked and shaped into various recipes, especially suitable for frying, maintaining superior texture and flavor.

In addition, the company offers a variety of other cassava-based products, always prioritizing the highest quality and convenience. All products were developed with consumer convenience in mind, without compromising flavor or the consumption experience.
