

# LIQUEURS AND SPIRITS

## COMPANY

We are a foodtech company specializing in alcoholic beverages. We have a Family Farming Seal and a strong social and environmental commitment. Our network involves several universities, research centers and specialized companies.

We are present with several clients in Brazil, including regional and national retail chains. We offer our customers spectacular tasting experiences by delivering ready-to-drink alcoholic beverages made from tropical plants and fruits without using artificial colors and essences. Nature is enough for us!

## PRODUCTS

To date, we have the following results: 01 invention patent; 10 registered trademarks; 05 scientific initiation projects; 08 engineering course conclusion papers; 01 master's dissertation; 02 doctoral theses and much more to come. We have many partners on this journey: UFBA, IFBA, SENAI CIMATEC, UNEB, IESB, LNF and many others. All this to make a liqueur of excellence and strengthen Brazilian culture, especially that of the Northeast. Hooray!

We encourage the development of art by buying works by local artists and featuring them on our products. Cashew, cupuaçu, cocoa honey and tamarind liqueurs illustrate some of these works.

No use of chemical additives (colorants, preservatives, artificial essences; thickeners; use of tropical fruits).
