

## COMPANY

Eos was created by two brothers out of a passion for the world of coffee, which has always been very present in our lives because we come from a family of coffee growers. Since then, we have put all our love and affection into EOS specialty coffees, to make this dream come true, and to take this incredible coffee further and further.

Our coffee is meticulously cared for from the moment we plant the seedling, going through all the stages, including its first bloom, first harvest, drying process, processing, roasting and more.

**EOS is classified as a specialty coffee with scores above 85 and various sensory notes.**

## PRODUCTS

What sets EOS coffee apart from other coffees on the market is its quality, the purity and lightness it brings to consumers. We want to change the public's image that coffee is just for energy, coffee is to be tasted, enjoyed and to live memorable moments with loved ones. One of the things that sets us apart is the fact that we produce the coffee ourselves, right from the planting stage, so we're working hard to bring you something of the highest quality from the ground up.
