

COFFEE

COMPANY

Montueira Farm has always been connected to coffee production and selection of the best beans. The coffees of our production are of the species Mundo Novo/19, yellow Catuai and Catucaí/19, 100% Arabica species, modern and suitable for the farm altitude which is 1,050m.

With the production evolution of high-quality coffees, we identified the need to start roasting, and from there, Café Montueira was born, so that everyone could experience the delicious taste of our coffee and know our brand.

PRODUCTS

NCM 09.01.21.10

Montueira coffee is made by hand, in order to select only the best beans, to produce a coffee of excellent quality, always at the level of the best international coffees. With a total control of the process from the cultivation to our final consumer.

Offering Brazilian consumers the opportunity to experience the taste that they only had access to in the best coffee shops in Europe and the United States.

Another primary factor for us is to have the production process until it reaches the table of the self-sustainable consumer, protecting the respect for nature, to the human being and the culture of our land.

Roasted and ground coffee, roasted coffee beans - 250g and 500g
Nespresso compatible coffee capsule
