

COMPANY

Breyer Produtos das Abelhas was founded in 1980, under the direction of Professor Ernesto Ulrich Breyer, known for his activities in beekeeping. The family has a centuries-old tradition of beekeeping, which was brought to Brazil from Germany in 1929.

Since then, the company has been consolidating itself in the national and international market, working with the purpose of offering products that promote health and well-being. It is the first company to launch propolis-based products in Brazil. There are more than 42 years of experience, selling products all over Brazil and exporting to several European countries, as well as the United States, Canada, and Japan.
