

Apiário SOL

HONEY AND BEE DERIVATIVES

COMPANY

Founded in 2003, Apiário Sol began as a simple family company focused on the production, sales and export of bee products – especially Honey and Propolis. It is based in the southern region of Minas Gerais, the leading producer of Green Propolis (Própolis Verde) in Brazil.

Apiário Sol has been gradually restructuring and expanding over the last few years. In 2007, the company achieved approval from the Federal Inspection Service (SIF) of the Ministry of Agriculture, a government agency that regulates, inspects and licenses Brazilian companies to produce and export food products, particularly of animal origin.

PRODUCTS

Honey is a unique product that contains proteins, various minerals and vitamins that are essential to health, and all these ingredients come together in the same product. Apiário Sol produces types of honey that include Orange, Eucalyptus, Silvestre, Coffee and Cipó-Uva.

Propolis is a resinous substance that is produced by bees through harvesting the resins from the flora of their region. It is a natural antibiotic that provides many other beneficial properties, and acts as a: antibacterial, antifungal, healing, antioxidant, anesthetic and immuno-stimulant.

Apiário Sol produces high-quality Green Propolis, reaching around 4 tons per month in sales targeted to exports and the domestic market.
