

COMPANY

Expoente was founded by Jair Almeida da Silva, an agronomist with extensive experience started in 1975. He worked for 20 years in a leading company in the agricultural market, coordinating the production of 35 thousand hectares of rice, including seeds and livestock. Since 1995, it has been dedicated to the commercial area.

With more than 20 years of existence, Expoente is a family business, with two generations in management. The headquarters is in Pelotas, RS, Brazil's main rice producing state. The company also operates in other sectors of agribusiness and offers agricultural consulting.
