

# COFFEE

## COMPANY

We are a family passionate about the cultivation of specialty coffees, and we always seek to improve the quality of our beans in a sustainable way.

As a way to serve more people fascinated by good coffees, like us, we recently created a microenterprise, in which we sell specialty coffees in grains. It is important to highlight that our coffee production comes from family farming and the creation of this small company is the realization of a dream since 1993, where we started with the cultivation

## PRODUCTS

NCM 09.01.11.10

Special coffee, Catuaí variety, Arabica species. Due to suitable climatic and topographic conditions, we have as a result a full-bodied, pleasant and smooth coffee, with notes and nuances that vary between flavors and aromas, such as chocolate, caramel, pitaya, chamomile tea and sugar cane. Long and pleasant finish with a bright acidity! Cultivated at 1300m altitude, in Serra das Cabeças. Mountain located in the city of Araponga, in the countryside of Minas Gerais, in the region of Matas de Minas.

A special coffee, grown since 1993, by the hands of family farming; carrying with it the sustainability and environmental responsibility. Our crops are surrounded by native forests, grown with no pesticides. We prioritize the good management and conscious use of the soil, with the implementation of measures to prevent erosive processes. We preserve the existing springs on the property with planting of forest species threatened with extinction and conduction of rainwater to caves made in the soil that allows infiltration and recharge of the water table. Special coffee becomes more special when there is concern for the environment.

## DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

Our average annual production is 80 bags of 60kg each. All our production is Specialty Coffee, ranging from 84 points to 88 points, by the SCAA (Specialty Coffee Association America) evaluation method.
