The Melira brand arises with the purpose of adding value to the honey production carried out by family farmers in the Northeast region of Bahia, through cooperativism and technological innovation.

Melira honey has the wildflower taste of the region, is 100% pure and goes through strict quality control processes, inspected by the Ministry of Agriculture. Melira is the result of the work of men and women, united by cooperativism, just like bees!

The of Beekeepers Cooperative of Ribeira do Pombal - COOARP is based in the municipality of Ribeira do Pombal, Northeast region of the state of Bahia. The vegetation consists mainly of cactus and small trees, resistant to the climate. Constituting the flora, there are fruit trees such as: cashevo, mango and umbu trees, and also plants that have great importance for the production of honey in the region, such as: catinga de cheiro, candeia, quipé, caatinga de jacaré, Evancio, betonica, purslane, cipó-uva, caatinga preta.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

Annual capacity per year normally varies between 300 to 400 tons of honey, to some atypical variations that we reached 900 tons in the year 2020, for example.

Our production depends a lot on the climate, rains for flowering production of honey source nectar.
