

FRUIT AND VEGETABLES

COMPANY

Founded in 2020, Fazenda Dom Marco specializes in exporting organic roots, tubers and spices. Located in Piedade, São Paulo, 100 km from the capital and 200 km from the port of Santos, our farm has a modern processing and distribution center, combining tradition in the field, traceability and efficient logistics.

We understand that growing responsibly includes investing in sustainable practices in line with ESG principles and fostering partnerships with other producers. Our purpose is to bring the best of Brazilian agribusiness to the world, supplying our customers with high-quality products that are efficient and reliable.

PRODUCTS

We offer an exclusive two-stage pre-shipment disinfection process, specially developed to guarantee health safety and add value to exports. In the first phase, we carried out hydrothermal treatment by submersion in water, which was responsible for initial cleaning and reducing the microbial load. Then, with the cargo duly palletized, we apply controlled vaporization of ozone and peracetic acid in our own processing room. This combination ensures complete sterilization, eliminating fungi, mould and other pathogens.

This is a sustainable, effective and innovative method that preserves the quality of products, extends their useful life and guarantees compliance with the strictest international market requirements.

In addition, our strategic location represents a significant logistical advantage. Committed to sustainable practices, we offer products that combine health benefits, culinary versatility and multiple application possibilities in the food, cosmetics and pharmaceutical industries.
