

CAFÉ

COMPANY

The name **Latitude 13** directly refers to our geographical position - the home of exceptional coffee, considered the finest in Brazil and the rest of the world. Chapada Diamantina is a region full of lush nature and extraordinary beauty, where the altitude helps to create a perfect micro-climate for the growth and maturation of the finest arabica coffee cherries!

Our coffees are **100% single origin arabica beans**, which undergo strict quality control and tracking process. These beans are grown and sold by the producers themselves.
