

Cachaça Artesanal  
sem aditivos químicos  
*João Corrêa*

**ARTISANAL  
CACHAÇA**

## COMPANY

Fazenda Morro Alto, with its tradition in the production of cachaca since 1950, started by Mr. João Martins Corrêa, continues to preserve the artisanal methods that define its essence. Today, combining tradition and modernity, we use advanced equipment and innovative techniques, such as the development of yeast with roasted corn and the aging of ready-made cachaca.

We are self-sufficient in the production of sugarcane, grown in a rich soil that does not require fertilization, guaranteeing the purity and quality of our typically Minas Gerais cachaca. Under the administration of João Corrêa, together with his children, grandchildren and great-grandchildren, we keep alive the heritage of a unique artisan production.

## PRODUCTS

**NCM 2208.40.00**

Artisanal cachaca from Minas Gerais is a jewel of Brazilian culture, known for its traditional methods and exceptional quality. Produced on the farms of Minas Gerais, this cachaca is made with strict quality control, from the cultivation of sugar cane to distillation and aging.

The sugarcane is harvested by hand at the optimum point and fermented with natural yeasts, often unique to each farm. Distilled in copper stills, cachaca gains unique purity and flavor, often enriched by aging in wooden barrels such as oak or jequitibá, which add complexity to the drink.

The naturally fertile soil in Minas Gerais allows for sustainable sugarcane cultivation, reflected in the final quality of the cachaca, which is pure and authentic. Each sip of artisanal Minas Gerais cachaca reveals the dedication of generations of producers, offering a rich and genuine experience of the Minas Gerais tradition.

**A PRODUCT WITHOUT CHEMICAL ADDITIVES, PRODUCED BY HAND, WITH A LIGHT AND VELVETY TASTE. IT HAS AN ALCOHOL CONTENT OF APPROXIMATELY 40%, ENSURING AN AUTHENTIC AND SMOOTH EXPERIENCE.**

## DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

**PRODUCTION CAPACITY OF  
50 THOUSAND LITERS PER  
YEAR**
